Professional profile

Software engineer and web developer with three years of experience building websites. My mission is to help African businesses and entrepreneurs compete globally through websites and software that expand their reach and support growth. Creator of Careloop and StudyRPG; Computer Engineering student at Obafemi Awolowo University.

Technical skills

Languages and web: Python, JavaScript, HTML, CSS

Application development: FastAPI, SQLite, REST APIs, database migrations, responsive interfaces

Additional training: React, Django, UX/UI design, Python automation, troubleshooting

Tools and delivery: Git, GitHub, Vercel, Render

Education

Obafemi Awolowo University | Computer Engineering

2023 - 2027 (expected graduation)

Professional experience

HiiT Plc | Hardware and Engineering Support

Industrial training | 20 April 2026 - 20 October 2026

- Practised IP addressing, subnetting, VLANs, routing and DHCP; designed and tested a branch-office network topology.
- Performed PC assembly, hardware diagnosis, storage upgrades, Windows installation and preventive maintenance.

GIIT | Software Developer / Engineer

Selected project experience

Careloop | Customer and order management · Live website
16 April 2026 - 3 October 2026

- Built customer and product management, order workflows, and sales records using a Python back end and responsive web interface.
- Connected order handling with a WhatsApp handoff for delivery arrangements, supporting communication between businesses and customers.
- Used FastAPI, JavaScript, HTML/CSS, SQLite, and database migrations to support connected business records.

StudyRPG | Gamified learning platform · GitHub repository
20 April 2026 - 3 November 2026

- Developed an immersive learning interface that presents study activities through a role-playing game experience.
- Designed the learning journey around purposeful practice and progression, with a landing page introducing notes, reading partners, and private study circles.

Professional certificates

Meta Front-End Developer | Aug 2023

Meta Back-End Developer | Aug 2023

Google IT Automation with Python | Sep 2023

Meta Principles of UX/UI Design — course certificate | Aug 2023
