Professional profile

Software engineer and web developer with three years of experience building websites. My mission is to help African businesses and entrepreneurs compete globally through websites and software that expand their reach and support growth. I combine responsive frontend development with Python back ends to make business tools easier to use and more dependable.

Professional experience

GIIT | Software Developer / Engineer Intern

April 2026 - October 2026

- Restored readable customer names on small mobile screens by rebuilding a layout that had broken names into individual letters.
- Diagnosed a silent email failure, traced it to an expired credential, and resolved the issue so notifications were delivered again.
- Worked with Python, FastAPI, SQLAlchemy, SQLite, PostgreSQL, HTML, CSS and JavaScript; used Git for version control and Render for deployment.

HiiT Plc | Hardware and Engineering Support

Industrial training | 20 April 2026 - 20 October 2026

- Designed and tested a branch-office network topology, applying IP addressing, subnetting, VLANs, routing and DHCP.
- Performed PC assembly, hardware diagnosis, storage upgrades, Windows installation and preventive maintenance.

Technical skills

Backend and data: Python, FastAPI, SQLAlchemy, SQLite, PostgreSQL, REST APIs and database migrations.

Frontend and delivery: HTML, CSS, JavaScript, responsive layouts, Git, GitHub, Render and Vercel.

Additional training: React, Django, UX/UI design, Python automation and troubleshooting.

Selected project experience

Careloop | Customer and order management
16 April 2026 - 3 October 2026

Built a business application that brings customer details, products, orders and sales records into a connected workflow.

- Developed a Python back end and responsive web interface to help business owners organise customer and order information.
- Added a WhatsApp handoff for delivery arrangements, supporting direct communication between businesses and customers.
- Used FastAPI, JavaScript, HTML/CSS, SQLite and database migrations.

Visit Careloop: www.mycareloop.com.ng

StudyRPG | Gamified learning platform
20 April 2026 - 3 November 2026

Developed an immersive learning interface that presents study activities through a role-playing game experience.

- Designed the learning journey around purposeful practice and progression, with a landing page introducing notes, reading partners and private study circles.
